

Triple Jump at a glance

Triple Jump is a dedicated impact-focused fund manager and advisor that provides meaningful and responsible investments in emerging markets.

What we do

Our international team combines investment and technical assistance experience to provide capital and capacity-building services in over 75 countries. We do this from 6 offices around the globe and across three business lines:

- Debt and equity investments in financial institutions.
- Investments into private equity and mezzanine SME funds.
- Direct investments into companies in the access to energy sector across Sub-Saharan Africa.

Our mission and vision

We believe that investing in entrepreneurship will unlock the potential to overcome global challenges related to poverty, inequality, climate and nature. We go where investing capital empowers people and improves lives.

In order to achieve that, we test innovative approaches and stay involved in markets as they mature. We aim to generate wider impact in these markets by focusing on four key development themes: **financial inclusion**, **affordable housing**, **missing middle finance** (SMEs), and **climate and nature**.

2021 highlights

- The second closing of Energy Entrepreneurs Growth Fund with FinDev Canada (USD 13M), bringing the fund size to 58M.
- Awarded – together with Persistent and Green Max – a mandate issued by KfW to manage the Clean Energy and Energy Inclusion for Africa Foundation (CEI): EUR 49M.
- The Dutch Good Growth Fund reached fully committed status, the mandate size increased by EUR 37.5M and reached EUR 390M.
- Strong recovery of 2021 investment due to flagship Micro Finance Fund yielding positive results (+3.6%) after 2020's performance.
- Successfully rolled out and implemented the Business Operating Model (BOM) as part of Triple Jump's operational excellence targets.
- Finalized research and feasibility study for an SME-focused net-positive biodiversity impact strategy including a full segmentation of the investable space.

Triple Jump moving forward

We will continue to focus on **access to finance** and expand our activities around **climate mitigation**, **access to renewable energy**, as well as **biodiversity and natural resources efficiency** through all Triple Jump business lines.

We are looking for partners to scale up our impact footprint and develop suitable investment strategies for private market investors across our business lines that:

- Decrease poverty & inequality by supporting entrepreneurs going beyond access to finance and into providing access to clean water, affordable housing products, and helping build climate resilience.
- Reduce GHG emissions by increasing investments in the climate and nature sector, raising climate awareness among the investee base and reducing Triple Jump's internal carbon footprint.
- Have a positive net biodiversity impact.
